

# candelabra light bulbs

Most Studio Steel lighting fixtures are built to receive candelabra based light bulbs.

The selection and variety of candelabra based bulbs is quite overwhelming, hence Studio Steel does not ship any of its fixtures, nor do we stock, light bulbs. Most local hardware stores, large DIY warehouse stores, and on-line stores offer an incredible selection. We strongly recommend you purchase LONG LIFE bulbs whenever possible, to eliminate replacing them too often.

Our fixtures are UL certified to receive up to 60 Watt bulbs in most cases, however we strongly recommend only purchasing and installing 40 Watt maximum.

Never use more than 25 Watt bulbs with any of our true Wax Candle Sleeves, and we recommend only using 40 Watt bulbs with our parchment (paper) shades.

**Frosted Straight Tip**

**Clear Straight Tip**

**Frosted Bent Tip**

**Clear Bent Tip**

**Clear Flicker Flame**  
*(Typically only 3 Watts)*

**Dimmable CFL**  
*Compact Fluorescent*  
*4 Watt / 165 Lumens*

**Silicone**  
*(Typically lower Watts)*

**Satin Spun**
