

candle sleeves

Studio Steel lighting fixtures are built and shipped with parchment (paper) candle sleeves.

Typically they are selected according to either the Finish selected, or by the client to coordinate with other design elements in the project space.

Our parchment candle sleeves are available in white or cream.

However, for an upcharge, based on the height of the candle sleeve, you can accessorize most of our lighting fixtures with true beeswax sleeves -- either in the color of white (ivory wax) or cream (beeswax).

Please note that variations in color of true beeswax sleeves naturally occur according to the time of year that the bees collect various pollen. We always attempt to outfit all fixtures in the same order with very similarly colored beeswax sleeves.
