

# chain & wire

## REMINDER - ORDER SUFFICIENT CHAIN & WIRE!

Fixtures are shipped with a specific amount of Chain & Wire based on the overall size of the fixture.  
(See Suggested Retail Price list or Estimate or Acknowledgement for specifics)

### Please calculate the fixture drop accurately:

- 1) Take the ceiling height
- 2) Subtract distance between floor and bottom of fixture
- 3) Subtract fixture height
- 4) Resulting number gives you total Chain & Wire length
- 5) Compare that to amount we outfit for that particular fixture

### Example:

Fifteen foot ceiling with a Studio Steel Bell (Model 123) Chandelier

$$15' - 7' = 8' - 3' = 5' \quad (\text{Result is Five Feet Total Chain \& Wire})$$

Bell 123 Chandelier comes standard with 3' (36") Chain & Wire.  
You will need to order an additional 2' (24") of Chain & Wire.

Most of our paperwork refers to CHAIN -- however it is implied, that it equates to Chain & Wire.  
In the event you have not ordered enough Chain, we typically ship with an additional foot or two of wire, just in case. Should you require additional Chain & Wire the fixture will most likely have to be reboxed, re-insured, re-shipped to Los Angeles, re-wired, re-tested, re-boxed, re-insured, re-shipped, all at specifier's prepaid expense.

Please contact showroom or call us if you have any questions concerning Chain & Wire length.
